IgE Alex®

哮喘、鼻炎、痕癢

可能源於食物及環境過敏

唔食心癢癢,食完身癢癢!別以為誤吃 食物或置身易敏環境,引發的只是輕 微或短暫的過敏反應。眼水或鼻水 難當,甚至身體抽搐或呼吸困難 這些都是過敏人士經食物或環境 接觸致敏原後,身體的免疫系統遭受

> 攻擊而可能產生的一連串反應 可演變成過敏性鼻炎、過敏性 哮喘等急性狀況。

不論嬰兒、小孩或成人也有 機會出現過敏症狀。日常生活中,經 常有機會與

食物及環境致敏原碰上,但您是 否了解自己過敏的真正原因?

副敏症狀 Checklist

- 皮膚痕癢
- 進食後無故肚痛/嘔吐

難以入睡

- 紅腫刺痛 經常流鼻/眼水

如以上情況持續出現或已影響日常生活 建議盡快找出原因

任由致敏原偷襲 越抗越敏

過敏造成的破壞遠超於生理上,長期的過敏反應令專注力和 情緒同時告急,嚴重影響日常社交、學習、睡眠質素或工作 表現。抗敏藥物雖然可用作紓緩,但停藥後,過敏症狀往往 變得反覆。我們理解過敏造成的身心壓力,與您一起作戰,揪 出真正致敏元兇

源頭防備,是最有效的抗敏防敏重要第一大步

抗敏方法一籮籮,但未知原因亂咁試,隨時得不償失:

病情反覆

痛失墊愛

棄養寵物?

IgE ALEX® - Allergy Explorer

(0:

IgE ALEX®過敏血液測試全面涵蓋都市 常見的食物及環境致敏原類別,偵測超 過280種分子致敏原可能引致身體的反 應,為目前最大致敏原數目測試平台

IrgE ALEX®兩大技術優勢

- 利用最新的「分子致敏原測試」技術1,精確檢測致敏原組合成 分,根據致敏成分劃分過敏反應的嚴重程度和風險等級,從而 找出真正引發症狀的致敏原,並搜尋不同食物及環境中引致「交 叉反應」的相近致敏原分子,進一步評估過敏症狀,相比傳統 IgE測試,更有效全面看清過敏食物及環境因素
- 高效的CCDI (Cross-reactive Carbohydrate Determinants Inhibitor) 技術,有效篩走導致假陽性結果的「非致敏分子蛋白」2 令IgE ALEX®的測試結果能大幅剔除過往因呈假陽性而被誤判 為致敏原的食物和環境因素

InE Alex® 過敏血液測試

* 嶄新「分子過敏原測試」技術

測試精確至食物中的「分子過敏原 掌握致敏真正元兇和過敏成因

蝦蟹同蟑螂有一種相近引致

徹底追蹤致敏因素

辨別「分子過敏原」有助一舉揪出擁 有相近分子結構的致敏食物或環境因

減低假陽性測試結果

我們的服務

提供最全面和最專業的健康體檢計劃,免受潛 在的健康威脅

造健康完美體態。他還幫助您了解與生俱來 的潛能。

專業幫您找出可導致過敏的威脅的常見食物 和環境致敏兇手,為您提供個性化和專業建 議去管理過敏情況

可在早期偵測您體內的異常細胞來幫您遠離 癌症威脅,幫助您降低癌症風險

關係法眼總監

提供多項DNA鑑定服務,解決您在血緣關係 方面的懷疑與煩惱,助您確定至愛至親

IgE Alex® Allergy Blood Test

A new molecular approach to allergy diagnosis to screen out false positive test results

Allergy Buster

Asthma, Allergic rhinitis, Itchy May be due to food and environmental allergy triggers

Be careful! A craving for peanuts might just turn into an allergic reaction. Don't be complacent, thinking that eating food or exposing yourself to environmental allergens will only cause mild or temporary allergic

reactions. Watery eyes, allergic rhinitis, hives, convulsions are a series of reactions that may

> occur when the body's immune system malfunctions after being in contact with food or environmental allergens. In severe cases, allergies can even cause allergic rhinitis and

Babies, children and adults all have a chance of developing allergies. In our daily lives, we are frequently exposed to food and environmental allergens, but do vou really know the real reason behind an allergic reaction?

Typical Types of Allergy Symptom

	Itchy skin	vomiting after eating
	Hives	Runny nose/watery eyes
	Difficulty sleeping	Sneezing/Nasal congest
	Convulsions	Difficulty breathing

If the above symptoms have appeared and are affecting your everyday life,

we recommend you to find the cause as soon as possible.

Defeat Allergies by Clearing Out the Allergens

Allergies cause far greater damage than just the physical. The long-term allergic reactions can cause emotional stress and make it difficult to concentrate at work or school which could seriously affect social life, studies, quality of sleep and work performance. Allergy medication can help treat the symptoms of an allergic reaction, but it is far from a cure. Once ceasing the dosage, allergy symptoms recur upon contact with the

We understand the physical and mental stress caused by allergies, and we will fight the allergens with you to figure out the true cause.

Finding the source of allergies is the most effective way to prevent and protect yourself against allergic reactions

Preventing Allergies

Without knowing the exact allergy-causing agent, the things we invest in might not always produce expected results and may not be worth the hassle.

Taking allergy medication?

yourself from certain foods?

They could be innocent!

IgE ALEX® - Allergy Explorer **An Effective Way** to Prevent Allergies

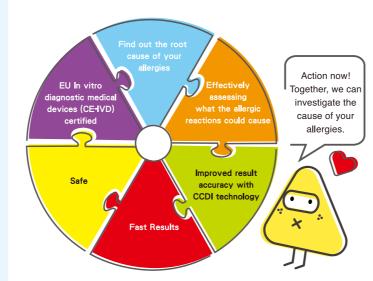

IgE ALEX® Allergy Blood Test covers the most common food and environmental allergens in the city. It detects more than 280 molecular allergens that may cause your allergy triggers. It is the largest allergen panel in total.

Two Technical Advantages

The groundbreaking molecular-based allergy test identifies molecular allergens by looking into the basic component of the food and environmental allergenic sources1. IgE ALEX® finds out and provides a list of food or environmental substances that could have "cross reactivity" similar molecular allergens causing certain allergic reactions. Contrary to the traditional IgE tests, IgE ALEX® is more promising and comprehensive in interpreting your allergic symptoms and finding the root cause behind your allergies.

Efficient CCDI (Cross-reactive Carbohydrate Determinant Inhibitor) technology effectively eliminate the "non-allergenic molecular proteins" 2 that could lead to false positive results and increases the accuracy. The IgE ALEX® test in comparison could significantly eliminate the false positives food and environmental allergens factors that were misinterpreted in the past.

A New Molecular **Approach to Allergy Diagnosis** IgE ALEX® Allergy Test

Groundbreaking Molecular-Based Allergy Diagnosi

By identifying molecular allergens, this test interprets your allergic symptoms to find the root cause behind your

similar molecular allergens and might be the root cause for your allergic symptoms.

Thorough Tracking of Allergens

By analysing the molecular composition of the identified allergen, IgE ALEX® can generate a list of similar molecular food and environmental allergens.

Screening out false positive test results

CCDI technology screening improves the accuracy of our tests by eliminating false positive results due to "non-allergenic molecular proteins."

allergen molecular llergens, IgE ALEX® could help you identify your true allergens with a peace of mind.

Our Services

Health Check Expert

provides the most comprehensive and professional health check-up programs, protecting you from potential health threats.

Helps you create a healthy body by knowing your nutrition needs and discover your potential talents through genetic testing.

helps you analyze common food and environmental threats causing allergic reactions. He provides you a personalized and professional advice for management of allergy conditions.

protects you from cancer threats by detecting abnormal cells in your body at early stages. He helps you reduce cancer risks.

DNA Relationship Director

provides expert DNA tests to confirm biological relationship and resolve any doubts you might have in kinship.
